Can i use a normal router on fiber optic cable wifi?

2019/09/06

Im not really good at this stuff so ill keep it simple, i hope. My local internet providers, Indehome, uses a fiber optic cable and they gave us a free Huawei router, they said it was their standard. But that router kinda have a low security (people can change the access the wifi security since the password and username cannot be changed) and has no ability to bandwidth certain persons internet speed. So, im thinking to replace it with TP-Link router which i got as gift. But it got no fiber optic socket. Any suggestion on what to do? It'd be goof if the new router doesnt go to waste D:thank you inbefore.

## **cell phone jammer Ann Arbor**
