Kind of long range multi house wifi solution - [Solved]

2019/08/18

Hi, We have a place with three houses that will soon get a new Internet connection, 100 down 10 up. I made a little sketch showing the layout of it:

<https://ibb.co/buH2T8> As the picture shows, we get the connection in the central house and want some kind of wireless connection to the others, while the one in the bottom of the picture has no power available. We have looked at different access points to provide wifi from the central house to the others, but are unsure whether the range will suffice. What would the best way to connect all the houses to the internet, preferably wirelessly, look like? Thanks for any help!
