Description The battle for control of the skies continues. As the amount of

unmanned aerial vehicles (UAVs) drones increases each year, many people are

stepping up their efforts to keep the devices out of the air. Times Starlight

Technology, a traditional RF Signal jammer manufacturer in Shenzhen, has now

developed various of new products, dubbed the Anti Drone Devices, that attacks

UAVs with radio waves. The Anti Drone Devices stated to use “radio control

frequency disruption technologies to safely stop drones in the air, before they can

pose a threat to military or civilian safety.” It operates on standard GPS, 2.4G, 5.8G

and ISM radio bands, allowing for it to interference with both commercial and special

UAV drone signals. The Anti Drone Devices can hit objects from 100 to 5000 meters

with an effective angle from 30° to 360°. Anti Drone Devices can be done from the

smallest handheld portable jammer to the biggest Prison Jammer and VIP vehicle

Mounted Jammer by different requirements. When a remote control signal is

interfered, drones will often enter into their safety protocols, which usually includes one of three options. It will either hover in place until the pilot can regain a control link, attempt to land so the pilot can recover it physically, or try to return to its point of origin. Since the Anti Drone Device is mentioned to be attacking the GPS signal as well (for optional, adjustable and can be turned off independently), the scenario is that the device will hover for a while or try to land.
