Wireless dropped out of nowhere - [Solved]
2019/09/18

I just upgraded my internet from 50Mbit (I know its about time) to a 1Gigabit. For the past month I have been getting around 275 on the speed tests through wireless with both an ASUS pcie card and an Alfa usb, up to 875 on ethernet. Last night and today I can only get 25 at most on wireless (even with a computer 2 ft from the router) and still 850-900 wired. Only thing that has changes was that my wired server was powered off then back on. My question is could my fios router be broken? It's a modem router combo from verizon.

cell phone jammer Dundee
