Miss loads of calls because you have to leave your phone in one place to get signal? Well no longer with the worldwide use Cell Phone Signal Booster (Dual Band GSM 900MHz/1800MHz). How does it work? Long story short, this Cell Phone Signal Booster introduces a revolutionary, patent-pending technology that captures low-signals from outside, brings it inside, enhances/boosts it, then extends that signal back out to create a large, high-signal cell phone zone. To prove it works perfectly, our product tester locked himself inside a metal shipping container coated on the inside with aluminum foil. His cell phone was left with 0 bars, but what happened when we turned on the Cell Phone Signal Booster? You got it - full bars and a perfect signal. Who is it useful for?
