Wifi Handheld Signal Jammer Built In Rechargeable Lithium Battery Continuous Operation

2020/07/30

Product Name: Handheld Signale Jammer Output Power: 6W Power Supply: 110-250VDC+12V Average Out-putting Power: 30dBm Dimensions: 310*110*35mm Net Weight: 0.6kgs Antennas: 6pcs Small Omni Antennas Color: Black/Golden 6 Bands 6W 30dBm portable phone signal Blocker , Handheld Signale Jammer for DCS , PHS , 3G , 4G , GPS , WIFI Product Introduction: Handheld mobile phone signal shielding device(aka portable mobile phone jammers / breaker / suppressor / chopper / isolator / meeting the confidentiality of information) is a high-tech product which is using foreign advanced technology,according to the actual situation of domestic and foreign mobile communication by carefully developed.Mainly for domestic and foreign some special need security and confidentiality of small places, such as private boss, confidential office, negotiation rooms,flow of vehicles, mobile politicians and business leaders escort site, etc.It can range from 1 to 10 meters in radius (usually about 5-80 square meters).Blocking GSM/CDMA/DCS/PHS/3G/4G/wifi signal,make the area of the phone can not play and answer,and will not interfere with other electronic devices in the environment.When the phone away from the shielding range, you can resume normal use.Give you a security. Product Fetures: Compact size - easily put in the bag or purse Built in rechargeable lithium battery Can be charged by AC adapter or car charger Frequency selectable:GSM , CDMA , DCS , PHS , 3G , 4G , GPS , WIFI , UHF , VHF , Etc. No harm to human body or other electronic devices Easy to operate, easy to use in mobile; Using alloy wire drawing shell, surface uses the international most advanced secondary oxidation 8 processing, total transmit power is 6W; Continuous operation, stable operation, long service life; Sustained shielding GPS signal,harmless to the human body; Signal corresponding shielding, do not interfere with other signals; Small volume,easy to carry; Battery life 2-3 hours. Product Applications: A special need for security and confidentiality of small places; Private boss office, confidential office, negotiation rooms; Defend the scene of the moving vehicle,mobile political and business figures. Party and government organs, enterprises of all kinds of small or temporary conference room; Personal life or business, special needs. Product Specification: Band Frequency

AC110-250V/DC +12V Working Temperature -40-50°C Relative Humidity 30-80%
Jamming Signal 2G/3G/WIFI/GPS Jamming Range 1-10m Output Port Six Ports
Changeable Signal GPS/WIFI/VHF/UHF Product Image: FAQ: Why is there still a
signal on the phone's signal indicator when it works? A: It's just an illusion. In fact,
the mobile phone has been unable to communicate. When you press the pull button,
you will find that there is no signal on the signal indicator. The cell phone signal
shield will not interfere with the normal work of other electronic devices. The
antenna should be installed on the corresponding signs of each channel on the host,
and then connected to the host power supply. The effective coverage of the shield is a
circular area centered around the shield, so be careful to choose the location of the
shield so as to avoid blocking the dead Angle? A: No. This is because the
electromagnetic signal emitted by the cell phone's signal shield is completely within
the country's mobile operating band, which only blocks mobile communication. And
this signal is always in a relatively static state, and will not affect any electronic
equipment. Are cell phone signal jammer harmful to people and mobile phones? A:
Please rest assured that the electromagnetic signal intensity emitted by the cell
phone signal jammer is very weak. The test data indicates that this signal strength is
far from harmful to the human body. At the same time, the mobile phone signal shield
is just blocking the forward signal of the phone, so that the cell phone cannot be
connected with the base station, so there will be no damage to the phone itself. Is
there any difference between the effective shielding distance of the mobile phone
signal shield in indoor and outdoor use? A: There are. The effective shielding distance
(30-40 meters) of the cell phone signal shield is generally referred to as indoor
distance. In open areas, the effective distance of shielding can be several hundred
meters. It should be noted, whether they are within the room, or in outdoor use,
effective shielding effect of shielding distance has relationship with environmental
conditions, such as from the base station near and far, placed, etc. Therefore, when
using cell phone signal shield, this factor should be fully taken into account to avoid
blocking the dead Angle and thus affect the shielding effect. Is the cellular signal
shield the same for GSM mobile phones and CDMA mobile phones? A: that's a good
question. Because CDMA mobile phone's anti-interference performance is far superior
to that of GSM mobile phone, the effective shielding distance for CDMA mobile phone
is smaller than that of GSM mobile phone, but the difference is not very large, about
2-4 meters. But it also reminds users to pay attention to some particularly important
sites, and should increase the number of mobile phone signal blockers when
necessary to ensure the shielding effect of CDMA mobile phones. After working for a
period of time, the mobile phone signal mask is hot. Will working long hours damage
the machine? A: thank you for your care. This is a normal phenomenon. In the design,
we use the thermal conductivity of aluminum alloy to assist the heat dissipation. This
can guarantee long time stable work. As a result, the machine will not damage the
machine.
