How to avoid Loctronix Mobile Explorer Platform indoor tracking? 2019/08/28

Hello Jeremy! Loctronics Mobile Explorer Platform is the recently developed indoor positioning system that has meter-level positioning and real-time tracking accuracy. In addition to the locaction tracking Loctronix MEP gives the information about your speed and direction of your movement. And also it can be integrated with any third-party mapping applications. Loctronix Mobile Explorer Platform uses SIRFstar V microchip with SIRFusion technology from the SIRFstar series made by CSR. This technology uses all available sources to precisely determine your location. Those sources include GNSS satellite navigation systems (US GPS, Russian GLONASS, European Galileo, Chinese Compass and Japanese QZSS), WiFi hotspots, cell phone towers, accelerometers, compasses and gyros. All those resources are used to successfully locate you outdoors, indoors and what is the most surprising - underground! So I guess now if someone wants to track your location it would be easy for them to do that using this new technology. But you can prevent Loctronix Mobile Explorer Platform tracking no matter where you are - indoors, outdoors or underground.
